

What is claimed is:

1. An entertainment system comprising:

5 an entertainment apparatus for executing various programs;

at least one manual controller for inputting a manual control request of a user to said entertainment apparatus;

10 a display monitor for displaying an image outputted from said entertainment apparatus; and

15 message displaying means for displaying a message on said display monitor such that words of a same type in meaning in said message are displayed in a same color.

2. An entertainment system according to claim 1, where-

15 message data to be processed by said message displaying means comprises a plurality of combinations of a data unit indicating a word to be displayed and a display color code of said word to be displayed, said display color code indicating a display color of said word corresponding to a type 20 of said word.

3. An entertainment system according to claim 2, where-

25 in said message determining means comprises display color code setting means for determining a type of a word having an undefined color code in said message data and defining said undefined color code based on the determined type.

4. An entertainment system according to claim 1, wherein said message displaying means comprises message frame displaying means for displaying a message frame containing said message.

5

5. An entertainment system according to claim 4, wherein said message frame displaying means comprises message frame determining means for determining a display area of said message frame based on the number of characters in said message and display areas of main objects in a scene presently displayed on said display monitor.

10

6. An entertainment apparatus for executing various programs, said entertainment apparatus being connectable to at least one manual controller for inputting a manual control request of a user to said entertainment apparatus, and connectable to a display monitor for displaying an image outputted from said entertainment apparatus,

20

wherein said entertainment apparatus comprises message displaying means for displaying a message on said display monitor such that words of a same type in meaning in said message are displayed in a same color.

25

7. A recording medium for storing a program and data for use of an entertainment system, said entertainment system comprising:

an entertainment apparatus for executing various pro-

grams;

at least one manual controller for inputting a manual control request of a user to said entertainment apparatus; and

5 a display monitor for displaying an image outputted from said entertainment apparatus;

wherein said program comprises the step of displaying a message on said display monitor such that words of a same type in meaning in said message are displayed in a same color.

8. A recording medium according to claim 7, wherein message data to be processed in said step of displaying a message comprises a plurality of combinations of a data unit indicating a word to be displayed and a display color code of said word to be displayed, said display color code indicating a display color of said word corresponding to a type of said word.

20 9. A recording medium according to claim 8, wherein said step of displaying a message comprises the step of determining a type of a word having an undefined color code in said message data and defining said undefined color code based on the determined type.

25

10. A recording medium according to claim 7, wherein said step of displaying a message comprises the step of dis-

playing a message frame containing said message.

11. A recording medium according to claim 10, wherein
said step of displaying a message comprises the step of de-
5 terminating a display area of said message frame based on the
number of characters in said message and display areas of
main objects in a scene presently displayed on said display
monitor.

10
12. A program readable and executable by a computer,
said program being for use of an entertainment system com-
prising:

15 an entertainment apparatus for executing various pro-
grams;

at least one manual controller for inputting a manual
control request of a user to said entertainment apparatus;
and

20 a display monitor for displaying an image outputted
from said entertainment apparatus;

wherein said program comprises the step of displaying a
message on said display monitor such that words of a same
type in meaning in said message are displayed in a same
color.
